

HAWAIIAN FLORAL MIST

Pacific Wide (NZ) Ltd introduces **Hawaiian Floral Mist**, the first and only bio-reactive floral food spray. **Hawaiian Floral Mist** is not a sealant – it does not coat the flower or plant with any wax or oil residue. It is a revolutionary product that penetrates the plant, nourishing and rejuvenating the inside while leaving the outside of the flower fresh, vibrant and fragrant. It can be used on all types of fresh cut flowers, greens, and even potted plants to keep them hydrated, colourful and fresher longer.

Hawaiian Floral Mist is an exclusive formula which penetrates and re-hydrates cut flowers, greens and even potted plants. It is not a water additive but rather a fully organic spray which penetrates the plant material promoting and accelerating the cell activity of the entire plant.

This specialised floral food spray is excellent for home growers or floral hobbyist as well as large commercial flower growers. All growers will find that the life of flowers will be prolonged which promotes saleability of the end product. The spray helps prevent bent neck in Gerberas and delay pollen drop in flowers such as Lilies. Potted plants benefit also as a small spray helps re-hydrate plants that are affected by air conditioning. **Hawaiian Floral Mist** is an amazing product and should be tried today.

Characteristics

100% organic product

Extends the life of cut flowers and potted plants from 30% – 140%

HFM Creates an environment just like the flowers and plants natural habitat
