

DÉCOR BARK

Many applications require products to decorate and landscape indoor, outdoor and potted areas. For this purpose nuggets of *Pinus radiata* bark are used to produce a décor product especially for use in decoration and landscaping.

Characteristics

Produced from 100% renewable *Pinus radiata* bark

Nuggets are a natural bright red/brown colour

Hard structure ensures the bark does not break down quickly

Can be used for decorating pots, indoor areas, outdoor gardens, road curbs, and other landscaped areas

Excellent ground cover for children's playgrounds as it cushions any falls

Helps retain moisture in the soil around plants and suppresses weed growth

Very clean product and easy to handle

Packaging sizes include 5L, 20L and 50L

Size ranges include:

3D (10-15mm)

4D (15-25mm)

6D (30-60mm)

Décor Bark is an excellent decorative material for all types of applications. Made from un-aged *Pinus radiata* bark, the larger sized grades provide good ground cover for outdoor situations including landscaped gardens, curb sides and large planters. As the material is round in nature and forms a cushion like layer on the ground, the material provides an excellent base for children's playgrounds. With a thick layer of material around trees and shrubs, Décor Bark helps to contain moisture in the ground while suppressing weed growth. The smaller sized nuggets make excellent décor for indoor pots whether large or small. The natural red/brown colour of the material finishes off any landscaped area or pot plant with intensity.
