

CANGro™ Vigour

CANGro™ Vigour is a wonderful media created from a blend of CANGro™ Initial and Classic Coir. This combination of composted bark and coir provides a mix that has the seed raising properties of CANGro™ Initial along with extra air and water holding from the coir. The appearance of long fibres in the Classic Coir increases the Air Filled Porosity (AFP) of the media while retaining good water holding ability.

Characteristics

Produced from entirely organic renewable resources

Consistent and high quality media

Combination of fine composted bark and Classic Coir

Used for general seed raising, bedding plants, fine potting and propagation

High Water Holding Capacity (WHC) and Air Filled Porosity (AFP)

Excellent rewetting ability due to the coir

Encourages good root formation

Contains natural beneficial organisms

No fertilisers or chemicals added

Produced using strict quality control standards

Chemical and physical analysis carried out on each batch

Technical:

Composition: Composted bark fines + Classic Coir

Common use: Seedling raising media, potting mix

Plants grown: Most nursery plants, seeds, cuttings

Analysis:

pH 5.8 – 6.5

EC (mS/cm) 0.4

Particle size 0 – 5mm plus fibres from the coir

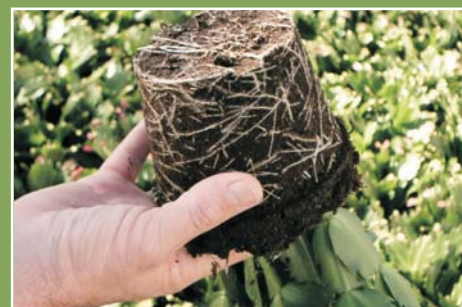

Air Filled Porosity (AFP) 20%

Water Holding Capacity (WHC) 65%

The combination of fine composted bark fines and Classic Coir produces a great blend used for all types of fine potting. The addition of the fibrous Classic Coir allows the media to rewet easily while adding an extra amount of air. **CANGro™ Vigour** is an excellent media for the growth of seedlings, bedding plants and transplants of varying types. Fertilisers are not added to the media unless specified by the grower.

As with all CANGro™ products, each batch of media is chemically and biologically tested before the products are sent.
