

PROFIT PLUS COIR

Profit Plus Coir is a coarse grade crushed coir product similar to that of Profit Coir however the crushed chip size is larger (10mm). This product is a specialised coconut fibre media designed for growing high quality plants with minimum effort. **Profit Plus Coir** is manufactured using a unique process where the complete coconut husk is crushed and washed then treated to create an ideal substrate for vegetable crops, flower crops and ornamental plants.

Profit Plus Coir material is an excellent substrate for growing commercial vegetable and flower crops which require high amounts of air. Being a crushed material the Air Filled Porosity (AFP) is increased while still retaining a high Water Holding Capacity (WHC). To prevent salt build up within the media **Profit Plus Coir** is buffered with a Calcium and Magnesium solution which helps keep EC low. **Profit Plus Coir** is a very stable product, since it contains a high proportion of coir fibres. The material can easily last for 3 or 4 years in the pot decreasing ongoing potting costs.

A variety of product sizes are available from the 4.5 kg bale to specialised slabs. All products are light and easy to handle and re-hydration is simple. Technical advice is available for this product from our technical consultants in Holland.

Characteristics

Produced from entirely organic renewable resources

High quality consistent product

Produced from cut and crushed coconut husk, chip size 10mm

Uniquely pre-washed with Calcium and Magnesium feeding solution to Dutch RHP standards

Increases water use efficiency

Very high air capacity

Promotes excellent root growth

Minimum reaction with nutrient solutions

Easy to re-hydrate and steer pH, EC and moisture contents

Used for vegetables, ornamentals, and flower crops such as orchids and gerberas

Very stable structure

A variety of product sizes available

Technical:

pH 5.5 – 6.0

EC (mS/cm) 1.0

Air / Water Ratio at 7cm 50%/ 50%

Pack sizes:

4 kg bales

A variety of slab sizes made to measure with pre cut drain and planting holes

PB18 blocks
