

COIR WEED MAT

Coir Weed Mat is a revolutionary product for weed control using fully renewable and biodegradable products. This **Coir Weed Mat** is derived using the husk of the fruit from the coconut palm. It is a perfect alternative to synthetic weed mats currently used.

Characteristics

Produced from entirely organic renewable resources

Environmentally friendly product

Produced under the Dutch RHP standards for growing media

Produced from coir fibre blended with a biodegradable natural latex

The product is a dense mat with the appearance of coir fibre

Excellent for protection of young plants from weeds

Conserves soil moisture for plants through the mulching effect

Consistent, stable product

Light and easy to handle

Fully biodegradable; degrade time will depend on area conditions

Natural light brown colour

Coir Weed Mat rolls provide one step weed control, erosion control and mulching

Available sizes:

1 x 10m rolls

500mm² weed mat squares

Coir Weed Mat is an environmentally friendly product designed for applications where moisture retention and weed protection is important. The **Coir Weed Mat** itself is a dense mat of coir formed by blending with a natural latex rubber. The end product is a thick robust mat approximately 20mm thick which is excellent at retaining moisture and reducing weed growth. The material is light and easy to handle. Two product sizes are available: the roll of weed mat which is used for all purpose weed control applications; and the 500mm squares. The squares are designed for cutting and placing easily around trees, shrubs and vines in areas such as gardens and orchards. Therefore less overall weed mat is required and laying is easier.

The **Coir Weed Mat** is fully biodegradable and will eventually break down. This time is dependent on the conditions where it is laid. The material can be left exposed or covered with decorative mulch. **Coir Weed Mat** is definitely an excellent addition to any garden area.
