

HYDRO MAT™

New Zealand Sphagnum moss is recognised world wide as a premium product due to its excellent structure and water holding capacity. Sphagnum is harvested from fully renewable resources which we continue to monitor to ensure both stability for the industry and compliance with environmental regulations.

Characteristics

Holds up to 13 times its own weight in water

Produced entirely from renewable resources

Does not accumulate salts

Absorbs water easily

Excellent air to water ratio

Retains structure for several years

Light and easy to handle

Sterile in nature allowing protection of roots from pathogens

Conserves water

Pack Sizes:

Each sheet 37cm by 29cm, 1cm thick

4 mats per pack

10 packs per carton

40 mats loose stow per carton

Often new plants struggle to get enough water to thrive; by using Hydro Mats you can dramatically increase plant survival due to more water being available to the root system. **Hydro Mat™** works to retain water and therefore acts as a natural water reservoir for your plants.

Hydro Mats are 100% organic and natural. They are produced from the petals of Sphagnum moss. Combined and compressed into easy to use sheets, Hydro Mats are ideal for giving your recently planted trees and shrubs the best start in life. Simply place into your plant hole, hydrate the Hydro Mats with approximately 4-5 litres of water and plant your plant as normal. It's that easy!
